

IS IT TIME FOR A CHANGE?

By Anne R. Carey and Sam Ward, USA TODAY

The radKIDS Personal Empowerment Safety and Life Skills Educational program is a revolutionary and effective tool in the everyday battle against violence and victimization in our children's lives. radKIDS has not only documented 73 saves from predatory abduction but has also received reports of thousands of saves and disclosures from sexual assault, abuse and molestation.

But unknown to many is that the radKIDS Personal Empowerment Safety Education and Life Skills curriculum has also received thousands of reports that educated and empowered radKIDS have not only stopped bullying violence but have also assisted many others by stopping the bully and therefore, being bystanders no more.

The radKIDS Child Centered approach is not only the most effective way to help prevent bullying but at the same time when shared within an educational setting, has been able to help create safer schools by empowering the children, faculty and schools with a **"Zero-Victimization" policy and practice instead of the failing Zero Tolerance System** which has sadly helped fuel a pandemic of bullying violence and victimization in our schools today.

Isn't it Time for a Change?

The radKIDS Child Centered Educational approach for both children and schools is making a difference. For further information feel free to contact us via email radKIDS@radKIDS.org or call us at 508-760-2080 . The time has come to make a change and together we can make a difference on child, one classroom and one school at a time.
